Subject: Anaconda Aluminum / Columbia Falls, MT / EPA Site ID MTD057561763 - Calbag Resources

Dear Mr. Chalfant:

Thank you for your response (copy attached for your reference) to my letter of November 28 in which my client, Calbag Resources, LLC, requested permission to place crushed concrete from the Columbia Falls aluminum plant in the concrete basements of the former aluminum plant, which the property owner (who is not my client) proposes to leave in place.

The issue has two unusual points that I'd like to discuss with you. The first is that the concrete that my client is cutting and crushing is only about 10% or 15% of the material that would go in the basements – it will be diluted down with clean fill because the basements are much larger than the volume of the crushed concrete. The second point is that the material is about the same in nature as a similar volume of concrete that is planned to be buried on site.

Do you have a few minutes available to talk about this situation?

Sincerely,

Dean N. Alterman
